### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1- 15, drawn to a nucleic acid comprising a low homology packaging signal cassette, the first product.

Group II, claim(s) 16- 24, and 34 drawn to an adenovirus helper virus and a cell containing it, the second product and method to use it.

Group III, claim(s) 25- 27, drawn to a helper dependent adenovirus vector with one segment of stuffer DNA.

Group IV, claim(s) 28- 33, drawn to a helper dependent adenovirus with 2 stuffer DNA segments.

Group V, claim(s) 35- 41, drawn to a method to generate helper dependent adenovirus requiring trans functions supplied by the cell not necessarily by a helper virus.

The inventions listed as Groups I- V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group I is directed to a nucleic acid, which is the first product. The special technical feature is the nucleic acid. Groups II- VI are drawn to structurally different products and methods which do not require special technical feature of group I and do not share the same or a corresponding technical feature. The Groups II, III, and IV inventions are drawn to different products, which do not require each other for their practice and do not

Art Unit: 1648

share the same or a corresponding technical feature. The method of group V has different requirements and is not limited to the special technical feature of groups I or II. The first named method is joined with the product that shares the same special technical feature and is included in group II. The first named method does not require the nucleic acid of claim 1 but shares the helper of claim 16. Since the special technical feature of the Group I invention is not present in the Group II-V claims, and the special technical features of the Group II-V inventions are not present in the Group I claims, unity of invention is lacking. Note that PCT Rule 13 does not provide for multiple products or methods within a single application.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
